PROFESSIONAL SUMMARY

Associate Software Engineer at Venera Technologies, converted to full-time following a 6-month internship delivering 150 automated Python test scripts, 120 validated API endpoints, and zero critical defects shipped across AWS cloud-native microservices. Strong foundation in SDLC, OOP, and quality engineering. Actively upskilling in AI Engineering — LLMs, LangChain, LangGraph, and Hugging Face — to build intelligent, scalable solutions.

TECHNICAL SKILLS

AI & ML: LLMs (OpenAI API), LangChain, LangGraph, Hugging Face, NLP, Prompt Engineering, Pinecone (RAG), Embeddings, Streamlit
Languages: Python (primary — AI/ML, automation, pytest), SQL/MySQL, Java (OOP, Multithreading, JDBC), Kotlin, C/C++
Testing & QA: Selenium WebDriver, pytest, Page Object Model, Postman (REST API), JUnit, Selenium Grid, SDLC, BVA, Exploratory Testing
Cloud & DevOps: AWS (hands-on), Azure, Jenkins, CI/CD, Bitbucket, Git/GitHub, Gradle, Maven, Zoho

EDUCATION

B.E. Computer Science Engineering — Chandigarh University, Punjab

CGPA: 8.31 / 10 | June 2026

AI TRAINING & CERTIFICATIONS

- **The AI Engineer Bootcamp 2026** (365 Careers, Udemy) — LLMs, NLP, LangChain, LangGraph, Hugging Face, Pinecone, OpenAI API, RAG, Streamlit | In Progress
- **Android Developer Badges – Google** | Java Spring & Microservices | Database Fundamentals | Design Thinking – LinkedIn

EXPERIENCE

Associate Software Engineer | Venera Technologies, Noida

Aug 2026 – Present

- **Contribute across the full SDLC** using OOP principles and QA best practices to improve product quality and reliability for Venera's cloud media QC platform.
- **Collaborate with dev and product teams** to define acceptance criteria, review test strategies, and ensure AWS cloud-native release readiness — reducing defect escape rate sprint over sprint.

Graduate Trainee / QA Engineer | Venera Technologies, Noida

Feb 2026 – Aug 2026

- **Engineered 150 automated Python test scripts** (Selenium + POM) — slashed manual regression time by 65%, 78% P1/P2 coverage, 3 critical regressions caught pre-release.
- **Validated 120 REST API endpoints** via Postman across AWS microservices; 98.3% pass rate, 2 production-blocking defects resolved before deployment.
- **Delivered zero critical defects to production** across 7 builds; intercepted a severity-1 503 failure and coordinated same-day hotfix, saving ~4 hours of user-facing downtime.
- **Managed 79 defects in Zoho** (61 resolved, 10 critical); maintained test assets in Bitbucket with structured PR reviews throughout.

Android Developer (Internship) | NullClass, Remote

Prior to Feb 2026

- **Built and optimised Android mobile applications** gaining hands-on experience in Kotlin, UI performance tuning, Firebase integration, and mobile SDLC delivery.

AI Engineering Projects | Self-directed / Bootcamp

2026 – Present

- **Architected a document Q&A chatbot** (LangChain + OpenAI + Pinecone + Streamlit) — reduced retrieval time ~70% across a 200-page knowledge base.
- **Built NLP pipelines** with Hugging Face Transformers; prompt engineering cut estimated LLM hallucination by 40%. Exploring LangGraph for multi-agent stateful AI workflows.

OTHER PROJECTS

- **Selenium Grid Automation:** Eliminated 80% of manual cross-browser effort across 3 browsers/2 OS environments; halved pre-release validation time.
- **Real-Time Chat App (Kotlin, Firebase):** Shipped Android chat app with secure auth, sub-second sync, stable under concurrent multi-user load.
- **Student Data Entry System (Java, MySQL):** CRUD servlet app — optimised JDBC queries reduced avg DB response time by 30%.
